

Cameron Can Foundation Party. Give. Love.

Dear Friend,

I am writing to ask for your assistance with our **2019 Cameron Rocks On event, benefiting The Cameron Can Foundation.**

Created in 2011, The Cameron Can Foundation was inspired by my son Cameron Dominick. Cameron was born in 2006 with a host of medical conditions affecting his heart, kidneys and brain, including Hydrocephalus. This is a serious condition, often requiring a lifetime of surgeries. After four years of caring for Cameron our family realized a lifetime of care was going to be a massive financial undertaking. After friends hosted a fundraiser for Cameron, we knew we had to help other families like our own, and so the Cameron Can Foundation was born as our way to **pay it forward.**

We believe this cause is larger than one child or one family. The Cameron Can Foundation has the ability to make a real difference in the lives of families and children with lifelong neurological conditions. The **Friends of Cameron** program provides quality of life grants through **tax-deductible donations** to Illinois families with neurological conditions—especially Hydrocephalus and Spina Bifida. These serious conditions often require a lifetime of surgeries, and these families will have a need for additional resources to care for their children.

On Friday, April 12th, we are holding the 7th Cameron Rocks On event at River Roast in Chicago.

This evening we are looking to raise funds to support as many children as possible and ensure we can continue to make meaningful contributions to Lurie Children's Hospital, YMCA Camp Independence and the Pediatric Hydrocephalus Foundation. Since our inception in 2010, we have raised over \$500,000 and assisted fifteen children with life-long neurological conditions.

We hope you'll consider sponsoring our event or donating to our silent auction. Cameron Can is a 501c3 non-profit organization (tax ID #90-0952247), **all donations are tax-deductible.**

We thank you in advance for your support of families affected by Hydrocephalus, Spina Bifida and other long term neurological conditions.

Thank you,

Rory Dominick, Executive Director
